

## About me

I work as a senior full-stack software engineer with a concentration on front-end architecture, frameworks, and tooling. I have found that I am drawn to environments with a development culture that prioritizes the improvement and enablement of its members. I prefer to work remotely and I am only interested in exploring full-time positions.

## Experience

### Senior Software Engineer

ACS Technologies  
April 2021 - present

[ { "bullet": "Front-end lead on the development of a greenfield business intelligence tool. This includes architectural planning, estimation of effort, and project development where optimized performance is a requirement." } ]

### Software Engineer

ACS Technologies  
July 2017 - April 2021

[ { "bullet": "Create multiple single-page applications that leverage modern functionality (code-splitting, etc.) using Vue.js, Vue CLI, Vuex, Vuetify, and other various tools." }, { "bullet": "Frequently handle integrations between internal projects written in Vue.js/modern JavaScript, C#/.NET MVC, and Golang as well as with third-party services and external APIs." }, { "bullet": "Create tools to standardize and improve developer experience and accelerate the rate of development (enum/JavaScript generator, dynamic link builders with permissions levels set via JWT, etc.)." }, { "bullet": "Developed an SSO authentication layer to provide a centralized integration point for internal and external products both future and present." }, { "bullet": "Designed and created a component library using Vue.js SFC, Rollup, npm, and Github Packages that generates npm packages and is being used in multiple projects with more to come." }, { "bullet": "Develop, design, implement, and maintain new and existing CRUD API endpoints using Golang." }, { "bullet": "Designed and implemented new databases and schemas using PostgreSQL for account management and authentication across multiple products." }, { "bullet": "Regularly meet with the UX design team to assess designs for technical feasibility, identify and step through user workflows, scope project requirements, and estimate level of effort (LOE)/required working hours before the active phase of development." }, { "bullet": "Designed and developed a tool that is used as a sandbox for rapid prototyping and also helps in facilitating UX/UI A/B testing." }, { "bullet": "Generate and present reports around team progress and project development status to management and stakeholders at the close of each sprint." }, { "bullet": "Regularly host and present at open invitation technical talks with an attendance of 20-30 representing individuals from multiple departments with varying levels of technical experience." }, { "bullet": "Mentor new and existing developers on a daily basis. Help lead a front-end developer community of practice with over 30 members." }, { "bullet": "Introduced updated testing procedures (BDD) and implemented tools to generate tests by translating Cucumber's Gherkin syntax." }, { "bullet": "Oversee and support contract work on a variety of projects such as a website builder and publisher, a streaming platform, and a portal to assist and provide documentation to a high-volume .NET web application with xxx unique visitors each month." }, { "bullet": "Provide leadership as a subject matter expert (SME) in analytics and styling languages (CSS/SCSS/LESS)." } ]

### Junior Software Engineer

ACS Technologies  
May 2015 - July 2017

[ { "bullet": "Developed, documented, and maintained a library used globally by a high-volume .NET web application with 50+ jQuery plugins and over 40 Vue.js components for 5+ years resulting in improved code stability and code reusability." }, { "bullet": "Migrated all global front-end components, plugins, and styles to the cloud from a high-volume .NET web application with over 600k unique visitors per month." }, { "bullet": "Actively participated (more than a few times) in all phases of the software development life cycle, from architectural planning to development and testing to release and maintenance." }, { "bullet": "Collaborate with stakeholders to develop clear, unambiguous technical requirements and establish a consistent feed-back loop during all phases of the development life cycle." }, { "bullet": "Optimized queries and document/subdocument/key indexing strategies in Couchbase." }, { "bullet": "Standardize, develop, document, and maintain a flexible, extensive design system that promotes design consistency, reduces the need for boilerplate code, and prevents code duplication." }, { "bullet": "Redesigned

a reporting engine to mitigate serious performance issues and increase its capacity to generate client data in multiple formats." } }

Education

Francis Marion University

B.S. in Computer Science, Minor in Applied Mathematics

Jan 2011 - Dec 2011

Francis Marion University, Florence, SC 29505

<> Projects

**jamieleviner.com**

Jekyll

My personal website.  
Created using the  
jekyll theme Jalpc.

**Muscovy's**

**Food & Spirits  
website**

JavaScript,  
jQuery  
Responsive  
restaurant website  
showing menu  
options, hours, a  
calendar of events, a  
photo gallery, and  
integrations with  
social media.

**IKS Metal**

**Slitting  
Calculator  
Android App  
(262  
downloads)**

Android/Java  
Calculates the  
optimal horizontal  
clearance for a  
slitter based on  
material type, gauge,  
and tensile strength.

**Box Ready**

**Android App  
(388  
downloads)**

Android/Java  
An 8 week  
customized workout  
builder with  
demonstration  
videos, a workout  
log, and terminology  
explanation section.

**Bar Buddy Android App (paid)**

Android/Java

Manages your bar tab, calculates tips, and even uses a geofence to prevent you from leaving the bar before closing your tab.
