

# JAMIE LEVINER

SENIOR SOFTWARE ENGINEER

## Experience

### ACS Technologies

*Senior Software Engineer*

April 2021 - present

Front-end lead on the development of a greenfield business intelligence tool. This includes architectural planning, estimation of effort, and project development where optimized performance is a requirement.

### ACS Technologies

*Software Engineer*

July 2017 - April 2021

Create multiple single-page applications that leverage modern functionality (code-splitting, etc.) using Vue.js, Vue CLI, Vuex, Vuetify, and other various tools.

Frequently handle integrations between internal projects written in Vue.js/modern JavaScript, C#/.NET MVC, and Golang as well as with third-party services and external API's.

Create tools to standardize and improve developer experience and accelerate the

## Education

### B.S. in Computer Science, Minor in Applied Mathematics

Francis Marion University

Florence, SC 29501

## Skills

JavaScript

jQuery

VueJS

CSS

SCSS/LESS

C#/ASP.NET MVC

Intercom

PostgreSQL

rate of development (enum/JavaScript generator, dynamic link builders with permissions levels set via JWT, etc.).

---

Developed an SSO authentication layer to provide a centralized integration point for internal and external products both future and present.

---

Designed and created a component library using Vue.js SFC's, Rollup, npm, and Github Packages that generates npm packages and is being used in multiple projects with more to come.

---

Develop, design, implement, and maintain new and existing CRUD API endpoints using Golang.

---

Designed and implemented new databases and schemas using PostgreSQL for account management and authentication across multiple products.

---

Regularly meet with the UX design team to assess designs for technical feasibility, identify and step through user workflows, scope project requirements, and estimate level of effort (LOE)/required working hours before the active phase of development.

---

Designed and developed a tool that is used as a sandbox for rapid prototyping and also helps in facilitating UX/UI A/B testing.

---

Generate and present reports around team progress and project development status to management and stakeholders at the close of each sprint.

---

Regularly host and present at open invitation technical talks with an

attendance of 20-30 representing individuals from multiple departments with varying levels of technical experience.

---

Mentor new and existing developers on a daily basis. Help lead a front-end developer community of practice with over 30 members.

---

Introduced updated testing procedures (BDD) and implemented tools to generate tests by translating Cucumber's Gherkin syntax.

---

Oversee and support contract work on a variety of projects such as a website builder and publisher, a streaming platform, and a portal to assist and provide documentation to a high-volume .NET web application with xxx unique visitors each month.

---

Provide leadership as a subject matter expert (SME) in analytics and styling languages (CSS/SCSS/LESS).

---

## **ACS Technologies**

*Junior Software Engineer*

May 2015 - July 2017

Developed, documented, and maintained a library used globally by a high-volume
