

JAMIE LEVINER

LEAD SOFTWARE ENGINEER

WORKING EXPERIENCE

PROJECTS

Lead Software Engineer -  
September 2021 - present

- › Established a tagging and release process. Set and followed a regular release cycle.
- › Rewrote the developer setup documentation.
- › Instituted scrum ceremonies and promoted their adoption by the team.
- › Enabled the use of the Help Portal within MissionInsite.
- › Integrated with IT to allow the auto-provisioning of new clients and client activation/deactivation.
- › Performed system-wide data updates with SQL Server using large third-party data sets.
- › Diagnosed and corrected issues preventing code generation between projects.
- › Integrated the Giving Dashboard Pilot (Tableau) into Realm (work unassociated with MissionInsite).

Senior Software Engineer -  
March 2021 - August 2021

- › Led a small team of developers tasked with building an analytics dashboard using Snowflake and the Sisense business intelligence tool.
- › Created a Vue SPA as a POC to assess the various embedding techniques offered by Sisense.
- › Embedded the analytics and data visualizations from Sisense into a Vue SPA.
- › Integrated the stand-alone Vue SPA into Realm (as a Vue SPA).

Software Engineer -

[jamieleviner.com](http://jamieleviner.com)

My personal website. Created using the jekyll theme Jalpc.

Muscovy's Food & Spirits website  
contract work

Responsive restaurant website showing menu options, hours, a calendar of events, a photo gallery and integrations with social media.

IKS Metal Slitting Calculator Android App (262 downloads)  
contract work

Calculates the optimal horizontal clearance for a slitter based on material type, gauge, and tensile strength.

Box Ready Android App (388 downloads)  
free w/ ads

An 8 week customized workout builder with demonstration videos, workout log, and terminology explanation section.

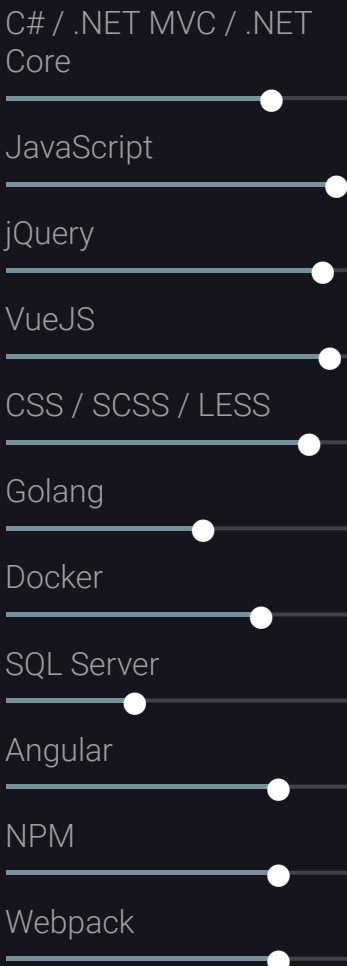

Bar Buddy Android App (paid)  
paid

Manages your bar tab, calculates tips, and even uses a geofence to prevent you from leaving the bar before closing your tab.

SKILLS

Grunt / Gulp

Team City / Octopus /  
Jenkins

Git

Bash / PowerShell

March 2019 - February 2021

- › Introduced updated testing procedures (BDD) and implemented tools to generate tests by translating Cucumber's Gherkin syntax.
- › Oversaw and supported contract work on a variety of projects such as a website builder and publisher, a streaming platform, and a portal to assist and provide documentation to Realm.
- › Regularly hosted and presented at open invitation technical talks with an attendance of 20-30 representing individuals from multiple departments with varying levels of technical experience.
- › Developed, designed, implemented, and maintained CRUD API endpoints using Golang.
- › Designed and implemented new databases and schemas using PostgreSQL for account management and authentication across multiple products.
- › Designed and developed a tool that is used as a sandbox for rapid prototyping and also helps in facilitating UX/UI A/B testing.

Software Engineer -  
March 2019 - February 2021

- › Developed an SSO authentication layer to provide a centralized integration point for internal and external products both future and present.
- › Designed and created a component library using Vue.js SFC's, Rollup, npm, and Github Packages that generated npm packages.

Software Engineer -  
May 2018 - February 2019

- › Contributed to all phases of product development, from architectural planning to development to the release.
- › Created a Vue SPA that allowed users to give to a church or organization.
- › Developed and maintained API's using Golang.
