JAMIE LEVINER

Lead Software Engineer

EXPERIENCE

Lead Software Engineer -
September 2021 - present

Established a tagging and release process. Set and
followed a regular release cycle.

Rewrote the developer setup documentation.

Instituted scrum ceremonies and promoted their
adoption by the team.

Enabled the use of the Help Portal within MissionInsite.

Integrated with IT to allow the auto-provisioning of new
clients and client activation/deactivation.

Performed system-wide data updates with SQL Server
using large third-party data sets.

Diagnosed and corrected issues preventing code
generation between projects.

Integrated the Giving Dashboard Pilot (Tableau) into
Realm (work unassociated with MissionInsite).

Senior Software Engineer -
March 2021 - August 2021

Led a small team of developers tasked with building an
analytics dashboard using Snowflake and the Sisense
business intelligence tool.

Created a Vue SPA as a POC to assess the various
embedding techniques offered by Sisense.

Embedded the analytics and data visualizations from
Sisense into a Vue SPA.

Integrated the stand-alone Vue SPA into Realm (as a Vue
SPA).

Software Engineer -
March 2019 - February 2021

Introduced updated testing procedures (BDD) and
implemented tools to generate tests by translating
Cucumber's Gherkin syntax.

Oversaw and supported contract work on a variety of
projects such as a website builder and publisher, a
streaming platform, and a portal to assist and provide
documentation to Realm.

Regularly hosted and presented at open invitation
technical talks with an attendance of 20-30 representing
individuals from multiple departments with varying
levels of technical experience.

Developed, designed, implemented, and maintained
CRUD API endpoints using Golang.

Designed and implemented new databases and
schemas using PostgreSQL for account management
and authentication across multiple products.

Designed and developed a tool that is used as a
sandbox for rapid prototyping and also helps in
facilitating UX/UI A/B testing.

Software Engineer -
March 2019 - February 2021

Developed an SSO authentication layer to provide a
centralized integration point for internal and external
products both future and present.

Designed and created a component library using Vue.js
SFC's, Rollup, npm, and Github Packages that generated
npm packages.

Software Engineer -
May 2018 - February 2019

Contributed to all phases of product development, from
architectural planning to development to the release.

Created a Vue SPA that allowed users to give to a church
or organization.
